

BREATHE BETTER

with Air Filter Supplies

Proven Effective
at Eliminating
Surface Based
and Airborne
SARS-CoV-2
Virus from
internal spaces*

The HALO-ROVE™ Commercial Air Purification System

The HALO-ROVE™ utilises RGF's patented PHI-CELL® technology to substantially reduce airborne and surface bacteria, viruses, odours and mould. Within minutes of operation, results show safe, clean air throughout the treated space.

The HALO-ROVE™ is designed as a standalone, portable active air purifier capable of treating up to 90 square metres.

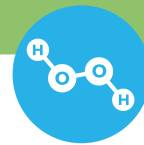

Ideal for use in:

-  CLASSROOMS
-  DAYCARES
-  CONFERENCE ROOMS
-  RESTAURANTS
-  BATHROOMS
-  BOATS
-  LOCKER ROOMS
-  OFFICES

1 year

Air Filter Supplies is committed to providing a "one-stop shop" for all of your air filtration requirements. As an air filter manufacturer, we are uniquely positioned to custom make most types of air filters.

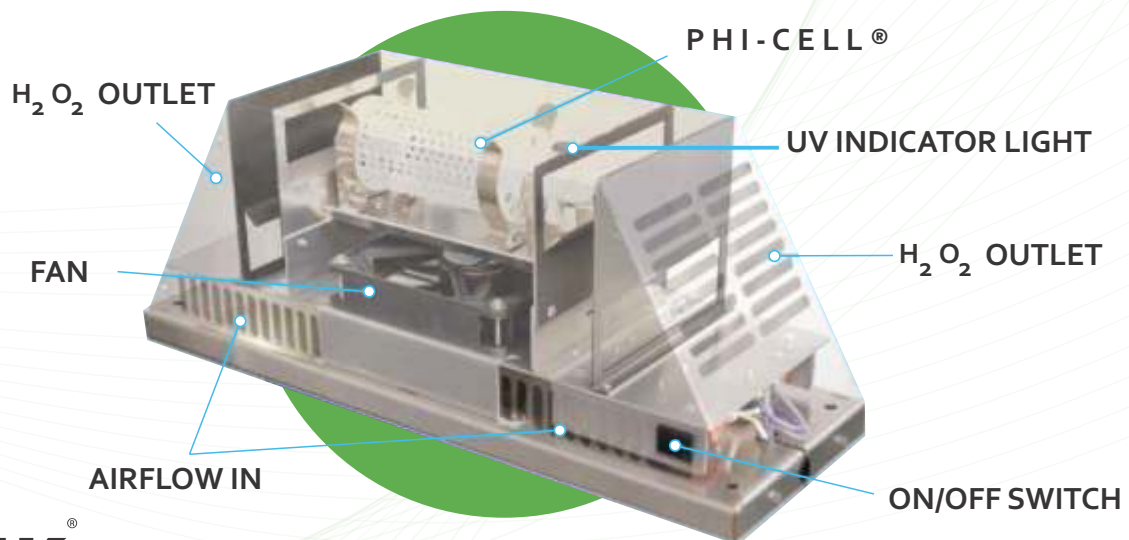

Why Use RGF's PHI-CELL® Technology?

The HALO-ROVE™ utilises RGF's patented Photohydroionisation® (PHI-CELL®) technology to substantially reduce airborne and surface bacteria, viruses, odours and mould and VOCs (chemical odors).

Photohydroionisation® (PHI) is an active air treatment technology. Active air treatment is the process of reducing air and surface contaminants by recreating safe, natural levels of hydrogen peroxide in occupied areas.

RGF's patented PHI-CELL® technology combines a photocatalytic process and a multiwavelength UV source to create active air purification. The combination of UV light and a hydrated catalyst drives a reaction that produces low level, airborne H₂O₂. RGF's PHI-CELL® air treatment systems are operating safely in over four million installations globally.
